DATEX II User Forum
20/21 March 2012 - Stockholm

Conclusions

Torsten Geißler, ESG 5 Coordinator

Attendance

- **Some 80+ attendents**
- **No shows were nearly zero**
- **Very attractive public-private mix of attendants**
- **Entire value chain for traffic information represented**

Quality of the Sessions

- **Very good distribution for parallel sessions**
- **High quality of the presentations**
- **Lot of stimulating discussions**

Atmosphere

- **Excellent conference location**
- **Splendid event at the Vasa Museum**

→ **The second DATEX User Forum was a success**

Growing user community

- **Growing interest in DATEX**
- **Deployment reports are key response from users**
- **Uneven regional uptake on European level**
- **EU ITS Directive serving as a catalyst**
- **Cross-references in Deployment Guidelines helpful**

ITS is a dynamic landscape

- **Standards are key for reliability**
- **DATEX is a landmark in the ITS landscape**
- **Opportunities drive new/better solutions (e.g. Loc Ref)**
- **Traffic information is an area for public-private partnership (based common view on value chains)**
- **Cooptition model**

Maturity of DATEX process

Scope / boundaries of DATEX

- **Cooperative systems**
- **Urban/interurban public transport**

European / worldwide standardisation

Organisational home
